Telephone: (626) 965-0911

Project Description:

Pursuant to Chapter 6.5 of the California Health and Safety Code, BKK Landfill Corporation has submitted to the Department of Toxic Substances Control (DTSC) and application for approval of: 1) a Hazardous Waste Facility Permit for the continued operation of a Leachate Treatment Plant (LTP); and, 2) a Post-Closure Permit for the continued care and maintenance of a closed Class I Landfill unit.

Under the California Environmental Quality Act (CEQA), this application has been determined to be a project for which DTSC has discretionary approval.

Project Location: BKK Landfill Corporation
2210 South Azusa Avenue
West Covina, California 91732

Assuming compliance with applicable laws and regulations, and with the terms and conditions of the Hazardous Waste Facility Permit, DTSC has determined that the project will not have a significant effect on the environment as that term is defined in the Public Resources Code, section 21068.

Mitigation Measures:

Mitigation Measures which have been made part of a project and have been included in the final Post-Closure Permit are detailed in the attached Initial Study. A summary of these Mitigation Measures are as follows:

Mitigation Measure #1: The establishment of three additional vinyl chloride air emission monitoring stations with increased frequency of monitoring and preparation of reports to DTSC.

Mitigation Measure #2: Selection and maintenance of protective vegetation to maintain integrity of the closed Class I Landfill unit cover, as reviewed and approved by DTSC.

Mitigation Measure #3: Cleanup and frequent monitoring of debris basins to preclude run-off and sediment deposition on neighboring streets with reporting of the cleanup and monitoring activities to DTSC.

Mitigation Measure #4: Establishment of adequate monitoring protocols to assure the vegetative cover achieves minimization of desiccation, cracking, and erosion of the final cover as approved by DTSC.
